

# NUMBUKO™

## WHAT IS NUMBUKO?

**Numbuko is a colourful, creative research-based app for exploring numbers.**

With Numbuko, children build and break colour rods to explore numbers 1 to 99. Designed for ages 4-8, Numbuko makes maths fun and mobile – an antidote to ‘drill and practice’ methods. You can also save patterns and share your work with others.

Numbuko is available for free on the iOS App Store for iPads.

## WHAT'S THE RESEARCH BEHIND NUMBUKO?

Funded by the Economic & Social Research Council, a team at the University of Edinburgh developed Numbuko to better understand how children interact with maths technologies.

# NUMBUKO™

## HOW DO YOU USE NUMBUKO?

Numbuko is an open-ended environment, but features a wide range of activity ideas for both specific maths skills and problem solving. You can make your own activities or, for inspiration, you can try our puzzle cards.

Visit our website for free downloads or to purchase puzzle card packs.
